

# Honeycreeper Images Pricing

Our photos are custom printed on a high-quality fine art printer using watercolor paper and archival pigment inks. As such, their longevity is like a watercolor painting rather than conventional photographic print which typically fades within a year or two. They are all signed and available unframed or framed in small, medium, and large sizes.

Honeycreeper's prices are based roughly on the photo's dimensions and the size of the print. The standard width x height ratios of our photos are 3 x 2, 4 x 3 and square sizes. We also have some panoramas which are 2 x 1 and 3 x 1. Use swapped dimensions for vertical photos. Please contact us to find out which specific sizes are available for any particular photo, email us at [info@honeycreeper.com](mailto:info@honeycreeper.com) with either the photo's code number shown on its web page or a detailed description of the photo and exactly where it was located on the website. The prices below show the various sizes and overall range of our pricing. Prices don't include shipping.
